Objective

Highly motivated Computer Science student with strong fundamentals in software development and problem-solving, seeking an opportunity to apply my technical skills in real-world applications while continuously learning and adapting to new technologies.

Education

KPR Institute of Engineering and Technology , Coimbatore, Tamil Nadu B.E. Computer Science and Engineering	2023 – 2027 CGPA: 9.1
Literacy Mission Matric Hr Sec School , Tirupur, Tamil Nadu HSC: 95% SSLC: 95%	2022 – 2023 2020 – 2021

Skills Summary

- **Languages:** Java, Python, C, JavaScript
- **Frontend:** React Js, HTML, CSS, Tailwind CSS
- **Backend:** Node Js, Django, RESTful API Development
- **Databases:** MySQL, MongoDB
- **Machine Learning:** Supervised and Unsupervised Learning, Classification, Regression, Model Evaluation
- **Frameworks/Libraries:** Pandas, NumPy, Scikit-learn, Matplotlib
- **Tools:** Git, PowerBI, VSCode
- **Problem Solving (DSA):** Solved 250+ problems across LeetCode, HackerRank, and GeeksforGeeks

Internship Experience

Softech System Solution, Salem (AI/ML Intern)	Jun 2025 - July 2025
• Built and evaluated machine learning models using Python and Scikit-Learn on real-world datasets • Performed data preprocessing and model evaluation as part of an end-to-end ML workflow	
Litz Tech, Coimbatore (Full Stack Development Intern)	Jan 2025 - Feb 2025
• Developed backend and application logic using Java for web-based applications • Assisted in integrating frontend and backend components and testing application features	

Projects

- **Real Estate Marketplace Application.** Developed a full-stack MERN Real Estate web application enabling users to search, list, and manage properties for rent and sale through a responsive interface. Implemented secure authentication using JWT and Firebase, and built RESTful APIs using Node.js and Express with MongoDB for complete CRUD operations on property listings. Added advanced search and filtering features, image uploads, and a user dashboard for easy listing management, while using Redux Toolkit for efficient state management and performance optimization.
GitHub Repo: github.com/deepikaj2006/mern-estate
Live Project: mern-estate-lz33.onrender.com
- **Intelligent Threat Detection System** – Developed a web-based application using Python, Django, and PyTorch to detect threats from images, videos. Implemented deep learning (MobileNetV2) for real-time image classification and provided a user-friendly interface for threat monitoring.

Professional Society

IEEE Education Society member.	2024 – 2025
--------------------------------	-------------

Certifications

- NPTEL: Practical Cyber Security for Cyber Security Practitioners, Natural Language Processing, Cyber Security and Privacy
- Hackerrank: Problem Solving (Basic, Intermediate), Frontend Developer(React)
- Great Learning: Front End Development-HTML
